

Bringing IXL home!

FREE ONLINE LEARNING FOR YOUR CHILD

We're happy to announce that all PA Cyber 3rd graders will use IXL to help reinforce our classroom curriculum this year. IXL is an online learning site that provides unlimited practice in over 6,000 topics. We've created a personal account for your child—sign in and explore!

What you'll find on IXL

UNLIMITED, UNIQUE QUESTIONS
to make practice engaging!

FUN AWARDS
to keep your child motivated!

ADAPTABLE SKILL LEVELS
to support and encourage your child!

DETAILED PARENT REPORTS
to stay in the know!

Have your child sign in today at <https://www.ixl.com/signin/pacyber!>

If your child needs help signing in, please contact his or her teacher.

Getting started with IXL

IXL is an online practice program that we will use to reinforce the curriculum this school year. The program will allow us to individualize the learning experience for students so that they can work at their own pace to master the material we will cover. Your child can sign in from home by visiting <https://www.ixl.com/signin/pacyber> on any computer and entering the username and password provided by the school. There are even iPad and Android apps to allow your child to practice on the go!

Making the most of IXL

To reinforce what your child has learned at school, have him or her practice on IXL at home! Your child has unlimited access to all IXL grade levels, and he or she can practice anywhere with Internet access. IXL breaks down topics into progressive skills for each grade level and content area, and provides immediate feedback with question-specific explanations for every incorrect answer. This makes it easy for your child to practice the material he or she needs to fill gaps in learning, keep up with the class, and even advance in topic areas of interest.

Monitoring progress

We want you to be involved in your child's education this year, and IXL will help keep you connected. When signed in to your child's account, a number of progress reports will be available to you under the Analytics tab, including the following that we recommend:

Progress and improvement: View all of the skills your child has practiced, and the progress he or she has made throughout the school year.

Trouble spots: View just the question types that your child is struggling with so that you can provide targeted help at home.

The IXL SmartScore

When tracking your child's progress, you will notice that many of the reports display a SmartScore for each skill. This is not a percentage or standard scoring system, but is based on a unique algorithm that understands the learning process. The SmartScore takes into account not only the number of questions a student has answered correctly and incorrectly, but also the difficulty of the problems and the student's ability to answer correctly with consistency. The benefit of this system is that the score will adapt no matter how many questions your child answers, ensuring that every student always has the possibility of reaching his or her SmartScore goal!
